

STEAM LAUNCH “TWILIGHT” FOR SALE

Reluctantly, due to ongoing health issues I am offering the model steam launch “Twilight” for sale to any NMSC Club Member.

Twilight is a model of a German River Launch, crafted by Bob Moore, who built her over approx. 600 hours.

Some of her features are;

Hull is timber and fibreglass, powered by a 2 cylinder steam engine with boiler, P5 Automatic Boiler Regulator and cylinder oil lubricator.

The boiler runs on butane, a full tank lasts about 20+ minutes, and has a Whale Oil Steam injector, also a steam and electric Steam whistle. It has a Header tank and an Electric demand feed water pump.

The electrics comprise a FlySky FS-i6 radio transmitter, a 3 cell LIPO battery, a FS receiver and ancillary switches etc.

Lots of spare bits and pieces, also a transport cradle and a launching trolley etc.

There is an operations manual for running and maintenance Twilight.

The launch has a length of 1450mm and a beam of 300mm. Weight with ballast is 14.2Kg.

The total cost of the machinery was over \$2,200.00

Asking price to an NMSC/GAGS Member is \$1,500.00
